WWW.UNDEROURSKIN.COM

A gripping tale of microbes, medicine & money UNDER OUR SKIN exposes the hidden story of **Lyme Disease**, one of the most controversial and fastest growing epidemics of our time larger than AIDS. Each year, thousands go undiagnosed or mis-diagnosed, often told that their symptoms are "all in their head." Following the stories of patients and physicians fighting for their lives and livelihoods, the film brings into focus a haunting picture of the health care system and a medical establishment all too willing to put profits ahead of patients.
